

PPP GREEN COMPLEX

Cookie Policy

1. What are Cookies?

Cookies are small text files downloaded to your computer or mobile device. They record various data and settings — for example, your language preference or current login status — to help you use the website and/or application (collectively "Services") continuously. They also collect browsing history in file form. Cookies do not harm your device, and their contents can only be read by the service that created them.

2. How Does PPP Green Complex Use Cookies?

PPP Green Complex uses cookies and similar technologies for the following purposes:

- To help remember your browser and settings, enable continuous access to the website, and enhance your experience and satisfaction.
- To evaluate the performance and effectiveness of the website and identify areas for improvement.
- To collect and analyse data about visits and website usage, helping PPP Green Complex understand what people are interested in and how they use its services.
- To deliver a better website experience and to present services and promotions that match your interests.

PPP Green Complex's various services may be offered across multiple websites, each of which may use one or more types of cookies for different purposes. You can view details of the cookies used on any particular website.

3. What Cookies Does PPP Green Complex Use?

The PPP Green Complex website uses both **first-party cookies** (set by PPP Green Complex) and **third-party cookies** (set by external service providers used by PPP Green Complex to enhance website functionality).

Cookies used by PPP Green Complex may be classified into two types by storage duration:

Session Cookies: Temporary cookies that exist only while you are visiting the PPP Green Complex website (e.g., to remember your selected language). They are deleted from your device when you leave the website or close the browser.

Persistent Cookies: Cookies that remain for a set period or until you delete them. They allow the website to remember you and your settings on return visits, making your experience faster and more convenient.

By purpose, PPP Green Complex uses four types of cookies:

Cookie Type	Description
Necessary Cookies	Essential for the website to function. They allow you to access various parts of the website and remember information you have provided. Disabling these cookies will prevent you from using core features that require cookies.
Functional Cookies	Help the website remember your preferences and settings, and deliver additional features and content tailored to your usage — e.g., your username, font size changes, or other page settings you can customise. Disabling these may cause the website to not function fully.
Performance Cookies	Allow PPP Green Complex to see user interactions on the website, including popular pages and areas. The data collected is anonymised and used only for statistical analysis. Disabling these means PPP Green Complex cannot track visitor numbers or assess service quality.
Analytics Cookies	Help understand how visitors interact with the website, including visitor count metrics and traffic sources.
Advertisement Cookies	Originate from third-party website integrations. They track your browsing activity to present relevant products or services on other websites outside of PPP Green Complex. Disabling them will not affect the PPP Green Complex website, but advertising on other sites may no longer match your interests.
Other Cookies	Cookies that do not fall into any of the categories described above.

As noted above, PPP Green Complex's services may be offered across multiple websites, each of which may use different cookie types as appropriate. PPP Green Complex will display cookie information and details — including cookie names in use — on the homepage of each service via a cookie banner, with a settings link where you can read full details of the cookies used on that service.

4. How to Disable Cookies

You can disable cookies by adjusting your browser settings and privacy preferences to block future data collection by cookies.

However, some website services require cookies to function. Disabling cookies may cause some or all features of those services to work improperly.

5. Links to Third-Party Websites

The PPP Green Complex website may contain links to third-party websites or social media, and may embed content or videos from social media platforms such as **YouTube** or **Facebook**. These allow you to access content and interact with others on social media from the PPP Green Complex website. Third-party websites and social media platforms set their own cookies, which PPP Green Complex

cannot control or be responsible for. We recommend reading the cookie policies or notices of those third parties.

6. Changes to This Notice

This notice may be updated periodically to reflect changes in circumstances. PPP Green Complex will post any updated notice on this website and encourages you to check this website regularly.
